

Marine Technical Specialist – Bulk Chemical Distribution

Location: North Vancouver, BC

About the North Vancouver business:

The North Vancouver facility stores caustic soda, glycols and denatured ethanol for distribution to customers in Western Canada and across the world. These products are used to make consumer goods such as clothing, packaging, and paper products.

We receive, store, and distribute our products with care to minimize risk for our workers, our community, and the environment. The products are transported to the North Vancouver facility by rail car and marine vessel, stored on site in tanks, and shipped to customers by road, rail, barge and marine vessel throughout Western Canada, the Pacific North West, and the World.

What you will do:

Reporting to the Terminal Manager, this position will support the site to implement Univar Safety Management Systems and Security Requirements appropriately and effectively.

- You will hold the Marine Facility Security Officer (MFSO) role and be responsible for tasks such as updating the Transport Canada Marine Security Plan along with managing all efforts re: site CTPAT certification
- You will be the focal point for all marine operations
- You will be part of the NVDC site on call operations team and have on call responsibilities 1/3 of the time. This will involve attending vessels and coordinating labour on some frequency
- You will be the Training Coordinator for all site personnel, longshore operators and foremen, marine surveyors, truck drivers, and a variety of other roles that support the site
- You will provide Responsible Distribution (RD) Support which includes attending Community Advisory Panel meetings, Port of Vancouver Environmental meetings, as well as supporting the North Shore Waterfront Industrial Association school program with classroom visits, and supporting North Shore Emergency Management efforts
- You will be the coordinator for a variety of audits such as TDG, Environment Canada, Transport Canada Marine Security, Kosher, Responsible Distribution, and customer quality audits
- You will coordinate the requirements of the Quality Management System, including ISO 9001 certification
- You will be the coordinator for a variety of reporting requirements, such as site KPIs, internal water reporting and air emissions, site incident reporting and participation in, and documentation of, Root Cause Investigations, and tracking action items
- You will be the site compliance coordinator for WorkSafe, federal requirements, and site systems including groundwater surveys, IH monitoring, annual foam testing, and site waste management
- You will coordinate safety meetings and perform housekeeping walkabouts and work with Univar EHS to ensure good communication of initiatives and best practices
- Additional tasks that arise at manager's discretion

Qualifications:

- Commitment to doing the right thing, and always working in an ethical manner
- Ability to build and maintain positive working relationships with a diverse group of stakeholders, implement initiatives and leverage knowledge from internal Univar subject matter experts
- Ideally, a post-secondary degree/diploma in related field to Occupational Health and Safety; Safety Management, Quality Systems or Regulatory
- Five (5) years experience in EHS or related fields required
- Marine Operations knowledge will be an asset
- Knowledge of regulations such as Transportation of Dangerous Goods, Environmental Emergency Regulations, Workplace Hazardous Information Systems, and Occupational Health and Safety
- Available for on-call work

To apply:

- Please submit your application (cover letter and resume please!) to Laurie Lemanski, HR Manager, laurie.lemanski@UnivarSolutions.com advising why you are interested in this position and why you would be a good fit.
